Re: California's Rigid Plastic Packaging Container (RPPC) Law

The California State Legislature enacted the rigid plastic packaging container (RPPC) statute as part of an effort to reduce the amount of plastic waste disposed in California landfills and increase the use of recycled plastic. The law regulates companies who produce or generate products that are held in RPPCs, which are sold or offered for sale in California.

The company name that appears on the container label of a product is designated by California law as the product manufacturer.

Parkway Plastics Inc since 1995 has taken our molds and light weighed the weight by 10% or more of the original designed weight. This not only applied to our containers that are 8oz and above, but we have applied this reduction to our containers under 8oz.

Parkway Plastics Inc has manufacture containers using 25 percent post consumer resins in its total weight to customers who are not exempt Public Resources Code (PRC) section 42340.

Listed below is information regarding what is exempt from California's Rigid Plastic Packaging Container (RPPC) Law.

Pursuant to Public Resources Code (PRC) section 42340, some RPPCs are exempt from demonstrating compliance with this law. These include containers:

- Produced in or outside of California that are destined for shipment outside California and that remain with the products upon shipment.
- Specifically used for shipping drugs, medical devices, cosmetics, food, medical food, or infant formula as defined by the Federal Food, Drug, and Cosmetic Act.
- Specifically used for shipping toxic or hazardous products regulated by the Federal Insecticide, Fungicide, and Rodenticide Act.
- Manufactured and specifically used for shipping hazardous materials that are prohibited by federal law from being manufactured with "used material" (post consumer resin) by federal packaging material specifications, or are subject to specified federal testing standards, or to which recommendations of the United Nations on the transport of dangerous goods are applicable.
- Further information please go to www.ciwmb.ca.gov/plastic/rppc/
